

Education

Master of Arts, Economics, University of Toronto

Sep 2025 – June 2026

- Honors/Awards: Master's Scholarship Award for Women in Economics and Finance, Bank of Canada
- Coursework: Micro, Macro, Econometrics, Causal ML, International Trade, Energy & Regulation, Industrial Organization

Bachelor of Arts, University of Toronto

Sep 2019 – June 2023

Major in Economics (Data Analytics); Minors in Mathematics and Political Science

- High Distinction; Dean's List 2020–2023
- Coursework: Computation & Data Science (A), Multivariate Calculus (A), Labour Econ (A+), Economic Policy (A+)

Employment Experience

Charles River Associates, Toronto, ON

Aug 2026 – Present

Associate

- Conducted quantitative and qualitative analyses of pharmaceutical and healthcare markets, supporting expert reports in complex antitrust, intellectual property, and commercial litigation matters.
- Drafted and quality-checked expert reports, exhibits, and client deliverables, synthesizing complex evidence into clear, defensible findings for attorneys, experts, and corporate clients.

University of Toronto, Toronto, ON

Sept 2025 – May 2026

Teaching Assistant

- Conducted weekly economics tutorials with Python-based economic analysis for courses on Data Analysis and Econometrics
- Held office hours and mentored students on data preprocessing, statistical modeling and visualization techniques in Python

Bank of Canada, Ottawa, ON

June 2023 – May 2025

Research Assistant

- Built Machine Learning models forecasting unemployment 12 months ahead, evaluated to have 89% accuracy
- Engineered ETL data pipelines (using pandas and Polars) analyzing 500k+ records (CPI, GDP, Labour indicators)
- Automated tariff-impact analysis and visualizations used for data-driven decision making by the Executive Council
- Translated complex economic formulas into automated forecasting tools, cutting manual processing time by 70%

University of Toronto, Toronto, ON

Sept 2021 – June 2023

Research Assistant

- Contributed to Professor Morley Gunderson's research on labour market participation by conducting econometric analysis in R (regression modeling, robustness checks, data cleaning) to support empirical findings on labor market barriers
- Compiled and structured large-scale labor market datasets (e.g., survey and administrative data) to analyze workforce participation among older workers and marginalized groups

Ministry of Transportation Ontario, Toronto, ON

May 2022 – Aug 2022

Research Assistant

- Produced monthly reports on labor market conditions in provincial subsectors of the economy for a Ministry wide audience
- Spearheaded statistical analysis and data management for the MTO Recovery Dashboard, used by policymakers
- Updated databases for performance indicators (KPIs), trade data, and Canada-wide economic data

Academic Projects

Should Cash Transfer Programs Be Targeted by Household Income?

- Reexamined Baird, McIntosh, and Özler (2011) by analyzing heterogeneous impacts of cash transfers across poverty levels, showing that the positive effects are larger for students who are less poor.
- Implemented novel Machine Learning techniques including ensemble methods (Random Forests, Bagging, Boosting), Propensity Score Matching, Meta-Learners, Doubly Robust methods, and Double Machine Learning

Immigration and Labour Productivity: Evidence from a Provincial Panel of Canada

- Conducted a provincial panel analysis (2006–2023) using Solow growth accounting and advanced econometric models (FE/RE, Hausman–Taylor, BMS, AM) to assess the relationship between immigration, capital intensity, industry structure, and labour productivity in Canada.
- Found that productivity growth is driven by capital deepening and industrial structure, showing immigrant employment share has no significant short-run effect on productivity.

Skills & Interests

- **Technical:** Excel (VLOOKUP, XLOOKUP, COUNTIFS, SUMIFS, Index/match, pivot tables), PowerPoint, Python (pandas, polars, NumPy, scikit-learn, statsmodels), VSCode, STATA, R, SQL, Azure, Databricks, PowerBI, Tableau
- **Methods:** Machine Learning, Econometrics, Causal Inference, Time-Series Analysis, Forecasting, Statistical Modeling
- **Personal Interests:** Painting, art galleries, strength training, solo backpacking
